Is your home wasting energy and leaving you with high electric bills?

A home energy upgrade and low-interest loan from Aiken Electric Cooperative's (AEC) Help My House program might be a solution. AEC provides zero-down, low rate Help My House loans to help members in good standing improve the comfort and energy efficiency of their homes. The loans fund energy and cost-effective upgrades made by certified contractors. Members use some of the savings to pay their monthly electricity bills and loan payments.

How it Works

1. Contact Aiken Electric Cooperative and ask if your home qualifies for an energy audit.
2. If so, and the audit predicts enough savings, your home qualifies for Help My House.
3. A certified contractor will bid on the improvements identified on the audit (see below list for possible improvements)
4. After the contractor completes the work, it must pass a second audit and inspection.
5. AEC pays the contractor and you begin making loan payments with your electricity bills.

Improvements May Include

- Repairing/replacing HVAC
- Air sealing windows doors, etc.
- Sealing duct work
- Insulating attic, crawlspace
- Adding crawl space vapor barrier
